Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

<sup>1</sup> A '•' following a place name indicates that the place is also a false MCD; the false MCD name is not shown.

<sup>2</sup> In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a '.99' suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the anchor.

The diagram illustrates the components of a map. On the left, a vertical list of map features is shown: All Roads, Railroad, Post/Power Line, Physical Feature, and Nonvariable Boundary. To the right, a map area is shown with corresponding features: Stream/Shoreline, Intermittent Stream, River, Lake, and Glacier. Below the map area are three boxes: a legend box labeled 'LEGEND', an inset box labeled 'Inset', and an out area box labeled 'Out Area'.
